DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this section can be found in the prior office action. Prior office action dated 4 October 2002 is incorporated in this office action by reference.

Claims 1-10, 13-42, 44-48, and 52 have been allowed.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this examiner's amendment was given in a telephone interview with attorney Raymond M. Galasso representing the applicant on 9 June 2003.

By this examiner's amendment, claims 51, 53, 54, and 55 have been canceled without prejudice.

- **Cancel claims ~~51, 53, 54, and 55.~~**

Allowable Subject Matter

4. Claims 1-10, 13-42, 44-48, and 52 are allowed over the prior art of record.

5. The following is an examiner's statement of reason for allowance:

The closest prior art of record is U.S. Patent No. 5,991,749 to Paul H. Morril Jr. provides a method and system to transact through a cell phone. Morril teaches a method and system of transferring funds between first party and a second party. First party being a cell phone and second party being a person's financial account. The main difference between the Morril teaching and other systems is the entering of a certain code to conduct the transaction through the wireless service as well as confirming such transaction by providing a confirmation number code at the wireless device to be displayed to the user. The transaction verifications are a combination of biometric (Voice recognition) and bar code scanning. The prior art of record is not directed towards "optically scanning the first transaction code from the visual display". The prior art of record either singularly or in combination with other prior arts in the record does not teach the steps of displaying and scanning of the code provided to the wireless device

Art Unit: 3621

6. Independent claims 1, 34, and 52 contain the steps of "displaying the first transaction code on a visual display of the wireless communication device" and "optically scanning the first transaction code from the visual display". The closest prior art of record when taken either individually or in combination with other prior arts of record fails to teach or suggest the above steps as they have been claimed. It is clear that transaction verification is based on directly scanning of the "barcode" presented by the visual display of a wireless device. Consequently, claims 2-10, and 13-33 are dependent claims to claim 1, and claims 34-42 and 44-48 are dependent claims to claim 34, thus they have all the limitations of claims 1 and 34, therefore, they are allowable for the same reason.

7. The closest foreign prior art of record is Japanese Patent No. JP 2000285324A to Chatani Kimiyuki, and the NPL cited by the applicant titled "50 Things You Can Do with Cell Phone" by Hugh Ashton, 12 January 2001, (www.mcommercetimes.com/solutions/67), which they relate to the general state of the art.

Conclusion

8. Any comments considered necessary by the applicant must be submitted no later than the payment of the issues fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kambiz Abdi whose telephone number is (703) 305-3364. The examiner can normally be reached on 9:30 AM to 5:00 PM.

10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James P. Trammell can be reached on (703) 305-9768.
